

DECOLORATION GRADE

Description

Granulated activated carbon from marine pine wood through the activation of phosphoric acid.

Applications

Products characterized by it's high adsorption and desorption capacities.
Organic matter elimination of high melocular weight (decoloration, purification).
Used in the food industry.

Technical features

Moisture content as packed ,% MAX	15
Molasses value	330
Density, kg/m³/min	220
Grain size, % max : > 1.6 mm < 0,4 mm	5 3
Typical features	
Moisture content as packed, %	9
Molasses value	380
Density, kg/m³	230
Total ash values, %	3
Iodine Number	130
Methylene Blue number	15

Packaging

Available in 15kg barrels : reference **SI19936**

CARBOTECH [> link to technical data sheet](#)

You can put 2,4kg of activated carbon in a SIEBEC CARBOTECH of 11,6 liters.
