

Highlights

Siebec designed a precious metal recovery device, using ion exchange resins for small volume processes containing precious metals.

- Pre-filtration
- One passage needed on the resins
- Ideal for volumes under 300L

Technical features

Materials	PP or Plexyglas
Max temperature	80°C
Pre-filtration	10 µm
Treatment	Ion exchange resin
Pumps	M7
Flowrate	0,7 m³/h
Connections	Grooved nozzles

Dimensions
