

X100 Bag filter housing - Corrosion Resistant

Description

QFAP-X100 filter is a bag filter housing for the industrial sector.

Its machined design incorporates a hinged bolt cover for easy handling and sealing.

The filter housing is available with flange or nut connections.

Its polypropylene design makes it highly resistant to chemicals and guarantees a very long service life for the filter housing.

The filter housing accepts Qualipoche QPT X100 bags.

The cover is equipped with a 1" connection for mounting a vent valve or pressure gauge.

Characteristics & benefits

- Quick closure with eye-bolts (BB) for better pressure resistance.
- Available in polypropylene
- Filter pockets in size X100 with molded ring for improved sealing. See Qualipoche sheet.
- Cover seal : EPDM as standard, FPM on request.
- Options available on request :
 - Manometer + Valve Kit
 - Vent (EPDM): SI28970
 - Vent (FPM): SI28997
- Other caps and designs available on request.

Service conditions

Conditions of use according to 2014/68/EU

Fluid Group	State	Temperature	Maximum operating pressure
Non-hazardous fluid	Liquid	0 à 40 °C	7 bars
		40 à 50 °C	5 bars
		50 à 60 °C	4 bars
		60 à 70 °C	3 bars

Typical flow rates

ΔP (bar)

Typical initial pressure drop, water at 20°C viscosity 1cP

Flow rate (m³/h)

ORDER REFERENCE

Example :

QFAP - **A** X100 - **B** BB - **C** 2P1/4 - **D** PP - **E** E

A / Size

Code	Size
X100	X100 size pocket

D / Material

Code	Material
PP	Polypropylene

B / Cover closure

Code	Type
BB	Eye-bolts

E / Seals

Code	Type
E	EPDM
EA	EPDM ACS
V	FPM

C / Input / Output

Code	Type
2P1/4	2"1/4 male threaded union
B40	DN40 flange
