Siebec announces the acquisition of Polymem :

A strategic combination to strengthen industrial excellence in membrane filtration and water treatment.

STRENGTHENED INDUSTRIAL ROOTS

The Siebec / Quali-filtres Group, a long-standing leader in the manufacture of industrial water treatment filters and systems, is proud to announce the acquisition of Polymem, a recognized manufacturer of filtration membranes and membrane filtration systems. This acquisition positions the Group as a provider of turnkey solutions in ambitious and strategic markets: drinking water, hospitals, nuclear, aeronautics, chemicals, wastewater treatment plants, and more. By combining the expertise of both entities, the Group strengthens its ability to meet the highest requirements of these sectors.

INNOVATION & EXPANDED OFFERING

With this acquisition, Siebec / Quali-filtres reaffirms its commitment to technological innovation. The integration of Polymem enables the Group to expand its offering with high value-added hollow-fiber membrane filtration solutions (microfiltration, ultrafiltration, nanofiltration).

A GROUP WITH AN INTERNATIONAL REACH

The acquisition of Polymem allows the Siebec Group to reach €50 million in revenue, supported by a team of 250 employees across 5 industrial sites and 5 sales subsidiaries in Europe (France, Spain, Germany, Italy, England, and Portugal). This strategic scale strengthens the Group's ability to innovate, manufacture, and meet the growing needs of its customers, both in Europe and internationally.
